

Expected-utility representation $\Rightarrow$ Completeness

Result — ai; produced by Claude Fable 5.1 (Cowork session).

0.1 Premises

- **Expected-utility representation.** There is a function $u : X \rightarrow \mathbb{R}$ such that for all $p, q \in \Delta(X)$: $p \succcurlyeq q$ if and only if $EU_u(p) \geq EU_u(q)$.

0.2 Conclusion

- **Completeness.** For all $p, q \in \Delta(X)$: $p \succcurlyeq q$ or $q \succcurlyeq p$.

0.3 Proof

Real numbers are totally ordered: $EU_u(p) \geq EU_u(q)$ or $EU_u(q) \geq EU_u(p)$.
